

Findley Lake Sewer District Is Moving Forward

With the recent announcement by Governor Hochul's office that the Town of Mina has been awarded a \$13,050,000 New York State Water Infrastructure Improvements grant, the Town is now ready to proceed. The Town was notified months ago that it was also awarded a Federal Bipartisan Infrastructure Law grant of \$13,050,000 bringing the total grant funds awarded for the project to \$26,100,000 – the total amount of capital costs voted upon and approved by sewer district property owners on October 21, 2023.

The Mina Town Board will be working with Square Engineering on the design phase of the project including an approximate timeframe for the various steps in the project. More information will be released when it becomes available.
